Product Description

Stationary Painless Hair Removal System Equipped With 2 Cooling Fans

Product Description:

With a powerful 600W laser, this Hair Removal Laser Machine can remove hair quickly and efficiently, making it a perfect solution for anyone looking for a quick and easy hair removal process. The laser type used in this machine is of the highest quality, ensuring that your skin is not damaged during the process.

In addition to its powerful laser, this Hair Removal Laser Machine also comes equipped with two cooling fans to ensure that your skin remains cool and comfortable throughout the process. The Skin Contact Cooling feature ensures that the skin is not damaged during the process, and the Automatic Power Cut-off feature ensures that the machine automatically shuts off if it senses that the skin is getting too hot.

The Hair Removal Laser Machine also comes with a large 15-inch Touch Screen display, making it easy to navigate through the different settings and options. This display provides you with all the information you need to ensure that you are using the machine correctly and safely.

This Hair Removal Laser Machine is perfect for both men and women, and can be used on a variety of different body parts, including the legs, arms, underarms, bikini line, and more. It is a safe and effective way to remove hair, without the need for painful waxing or time-consuming shaving.

Overall, the Painless Hair Removal System is a high-quality, professional hair removal device that is perfect for anyone looking for a safe and effective way to remove hair. Its powerful laser, Skin Contact Cooling feature, and Automatic Power Cut-off feature make it a great choice for anyone looking for a hair depilator machine that they can use in the comfort of their own home.

Applications:

The TM-1 model is manufactured in Guangzhou, China, and is equipped with a powerful 600W laser system that can cater to different skin types ranging from I to VI. This laser hair elimination machine is built to provide a safe and effective hair removal experience, thanks to its skin contact cooling feature that ensures the skin remains cool during the treatment. The automatic power cut-off feature also ensures that the device shuts down automatically when it is not in use to prevent accidents.

This hair removal laser machine is a stationary and vertical device that uses two cooling fans to keep the device running efficiently. It is ideal for use in various settings such as homes, beauty salons, and other commercial establishments that offer hair removal services. The TM-1 model is also easy to operate, making it suitable for both beginners and professionals.

The TM-1 Hair Removal Laser Machine is perfect for those looking for a long-lasting solution to unwanted hair growth. It can be used on different parts of the body, including the face, legs, underarms, and bikini area. The device's laser technology ensures that hair growth is slowed down, and eventually, hair follicles are destroyed, leading to permanent hair removal.

Whether it's for personal use or as an addition to a business, the LZR TM-1 Hair Removal Laser Machine is the perfect device for those seeking a safe, efficient, and professional hair removal experience. This laser hair elimination machine guarantees smooth skin and a hair-free body for a long time.

Customization:

The LZR Hair Removal Laser Machine (Model Number: TM-1) is an advanced hair removal system that delivers painless and permanent results. Made in China Guangzhou, this stationary and vertical machine features a pulse duration of 10-400 Ms and a machine power of 1200W. Its permanent laser hair removal app is suitable for skin types I-VI, making it a versatile device for a wide range of customers.
